

ALL YOUR RELEASE PAPER NEEDS IN ONE PLACE

RELEASE LINER

INDUSTRIAL

KEY APPLICATIONS

- Artificial leather
- Breathable membranes
- Electronic parts
- Reflective products

KEY BENEFITS YOU CAN COUNT ON

Stable release level

With our products, you are promised an increase in productivity and a decrease in scrap as a result of constant release when using multiple applications. Our papers also have a uniform surface quality which leaves no uncoated spots. And most importantly, the release value of all our products is stable due to our unique polymer coating.

Unique surfaces

The extremely high quality of our products ensures a matt soft-touch surface. Depending on your individual needs, we offer various gloss grades and surfaces.

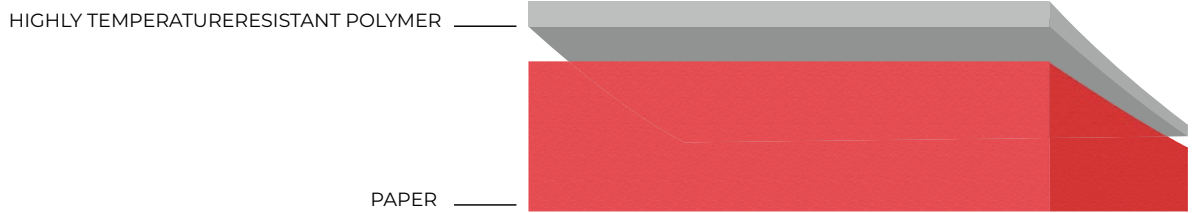

Exclusive polymer coating

Completely new to the market is our polymer soft-touch coating with different highly temperature-resistant coatings available. Our products are generally suitable for embossing processes.

INDUSTRIAL

Grade	Total weight g/m ²	lb/ream	Characteristics
Y02200	161	99	AFL: Highly temperature-resistant coating, fine matt
Y03200	108	66	Electronic application: Polypropylene-coated, matt/glossy
Y05200	180	111	AFL: Highly temperature-resistant coating, fine matt
Y05900	180	111	AFL: Highly temperature-resistant coating, glossy
Y23300	161	99	AFL & Membrane: Polypropylene-coated, fine matt
Y51100	135	83	Reflective: Paper base
Y52800	145	89	Reflective: PET film base
